HahaLife Shopping

account.html 是 member, seller 和 admin 共用的，不需要個別重寫。

Member use:

base_m.html

> title tag: HahaLife Shopping

> navbar: Logo (click to index.html), User {select options: Account (a page for setting member details), My purchase (a page for display purchased history), Logout; Each option is a link}

> copyright footer

index.html (path: localhost:8000/hahalife/)

> navbar: Notification (click to notification.html), Cart (click to cart.html)

> search bar (Acceptable: Name (Sql set contains) / ID)
Components: Search button

> search filter: tags, cheapest to highest, with discount, price range input, category
Components: "Apply" button, "Clear" button
After "Apply", display the result immediately, same as "Clear"

> product list: product name, category, stock (if zero, show "out of stock"), price, View Details (a link referred to the relevant product details)

product_detail_m.html (path: localhost:8000/hahalife/products/{pid})

> product name, category, stock, price, description, seller name, promo code available (if yes, show promocode and discount amount, else show "Not Available")

Component: "Quantity" button, "Add To Cart" button

> seller reviews, buyer reviews（這兩個放在產品下面，可以參考蝦皮）

cart.html （參考蝦皮）(path: localhost:8000/hahalife/cart/)

> "Select All" Checkbox

> single product: Checkbox for select product, seller name, product name, promo code input field (折扣碼輸入欄, 如果輸入錯誤，顯示"Promo Code is not available on this product"), unit price, quantity, subtotal, Action (Delete)

> summary: Total (n item(s)), total amount
Components: "Check Out" button (go to checkout page)

checkout.html ((path: localhost:8000/hahalife/checkout/?)

> delivery address

> seller name, product name, unit price, quantity, subtotal, promo code (if has), shipping option: [doorstep delivery, convenience shop (Show 711, Family Mart, OK Mart…)],

> Payment method (Mastercard, Visa, Cash On Delivery), if mastercard or visa is chosen, show input fields (cardholder name, card number, expiration date, cvv)

> "Place Order" Button, see the figure, then it may show "Order Successfully" and the order id should be created, and all the necessary parts (like shipping detail)

Merchandise Subtotal	RM1,051.00
Shipping Subtotal (excl. sst)	RM9.80
Shipping Fee SST ⑦	RM0.58
Voucher Discount	-RM35.00
Total Payment:	**RM1,026.38**
	Sales Tax on LVG included, where applicable ⑦

<div style="text-align:center">Place Order</div>

account.html (path: localhost:8000/hahalife/myaccount/)

> show all details of the current member, and make them modifiable

> MLevel 不用顯示出來，那個我後面會處理

> Component: "Save" button

purchase.html (path: localhost:8000/hahalife/mypurchase/)

> show all purchased history of the current member. (調用 orderhistory table)

> Can click OID and go to see purchased detail

purchased_detail.html (path: localhost:8000/hahalife/mypurchase/{oid}/)

> Show purchased detail based on the order id (包含一堆，有 shipment、payment……)

> Can review on purchased products.

> Can cancel order

notification.html (path: localhost:8000/hahalife/notification/)
> show all notifications

Seller use:

base_s.html

> title tag: HahaLife Shopping

> header bar: Logo (click to seller.html，放在中間位置), Logout (放在最右邊)

> copyright footer

seller.html (path: localhost:8000/hahalife/seller/)

> "My Account" , "My Order", "Add Product", "Manage Product", "Check Order"，這五個都是 link，只是可以用 css 把他們變得像 button

account.html (path: localhost:8000/hahalife/seller/myaccount/)

> show all details of the current seller, and make them modifiable

> SName 不用顯示出來，那個我後面會處理

> Component: "Save" button

addproduct.html (path: localhost:8000/hahalife/seller/add/)

> input Product Name, Category, Price, Description, Stock

> "Add" Button

manage.html (path: localhost:8000/hahalife/seller/product/)

> show the seller's products, there is a "Edit" button on each product side

> input: product id (seller can input product id to search and edit product)

商家進入這個頁面後不用輸入 id 就可以看到自己的商品，也可以輸入 id 找特定商品，按 edit 之後進入
localhost:8000/hahalife/seller/product/edit/{pid}

> product id is a link, click and go to /seller/product/{pid}/

product_detail_s.html (path: localhost:8000/hahalife/seller/product/{pid}/)

> product name, category, stock, price, description, seller name, promo code, seller reviews, buyer reviews

edit.html (path: localhost:8000/hahalife/seller/product/edit/{pid}/)

> show all details of edited product and make them modifiable

> "Save" Button

order.html (localhost:8000/hahalife/seller/order/)

> show sold history of the current seller (調用 sold history table)

> Can click OID and go to see order detail

order_detail.html (localhost:8000/hahalife/seller/order/{oid}/)

> Show order detail based on the order id (包含一堆，有 shipment、payment……)

> Can review on purchased products.

> Can update order status, shipping status, courier and tracking number

Admin use:

base_s.html

> title tag: HahaLife Shopping

> header bar: Logo (click to admin.html，放在中間位置), Logout (放在最右邊)

> copyright footer

admin.html (path: localhost:8000/hahalife/admin/)

> "My Account", "Review Applicant", "Manage User", "Manage Product"，這四個都是 link，只是可以用 css 把他們變得像 button

account.html (path: localhost:8000/hahalife/admin/myaccount/)

> show all details of the current admin, and make them modifiable

> Last Login 不用顯示出來，那個我後面會處理

> Component: "Save" button

review_applicant.html (path: localhost:8000/hahalife/admin/review-applicant/)

> review the applicant submitted information, update the application status and give the comment (optional).

> If approved, generate a seller account for the applicant, generate a random password for the new seller (avoid null error) and show the applicant his/her seller account details.

manage_user.html (path: localhost:8000/hahalife/admin/manage/user/)

> Can input member id or seller id to display their detail, the only thing that admin can do is to change user account status

manage_product.html (path: localhost:8000/hahalife/admin/manage/product/)

> input product id, it will display the product, and decide to remove the violated product or not
Component: "Remove" Button

Guest use:

略…，要配合 login 一起寫

> Any guest can view products but any actions like "Add to Cart" will redirect them to login/register page, require authentication and authorization.

Applicant use:

apply.html (path: localhost:8000/hahalife/new-seller/apply/)

> a page for an applicant to fill in all necessary information. See the applicant table for more information.

> "Submit" Button

> Show "Submitted" or "Submit Failed"

Login.html

Register.html
